Dear valued customer,

We are excited to present our NEW items for 2005! Use this brochure as an addendum to our 2003-2004 catalog and cuckoo catalog #50. With these three catalogs you can find many beautiful and marketable timepieces. Call today to place your order or to contact your sales representative.

-Dolf Kamper, sales manager

NEW Mantel clocks:

Elias Ingraham (1805-85), a cabinet maker, was commissioned by George Mitchell to design and build a new style of clock case. Ingraham came to work for Mitchell in May of 1828 and eventually designed the sharp gothic clock case in about 1845. This "steeple clock" style has ever since been one of the most popular designs in American cabinetry. It has been copied and redesigned countless times over the last two centuries.

The *New Haven* steeple clock from Sternreiter is named for the town in Connecticut which holds some of America's most beautiful examples of gothic architecture. Available with either mechanical or quartz Westminster chimes, the *New Haven* features a reverse-painted glass which harkens the beauty and complexity of a gothic cathedral's rose window.

MM 808 381 08 New Haven

11" x 21" x 5" (pictured left)

- 8-Day mechanical Westminster with shut-off

- Mechanical tambour
 - German-made, 8-day, Westminster movement
 - Chime on rods
 - Brass and crystal-glass bezel, hinged doors in front and back
 - Solid wood case with American cherry finish

The first authentic carriage clock was made in Paris at the start of the 19th Century, by Abraham-Louis Breguet (1747-1823). Carriage clocks are also known in France as "officers' clocks" and the name is based on an historical anecdote. It is said that Napoleon, having almost lost a battle because one of his officers was late, ordered his military chiefs to carry a carriage clock with them at all times. Orders placed with master clockmakers always included the reference "a clock for an officer" and this brought the name into common parlance.

Our carriage clocks are gold-plated with the traditional, shock-resistant, platform-mounted jeweled escapement. Each carriage clock comes with a leather-bound, upholstered-interior presentation box and gold key. These clocks are sure to be collector's items and heirloom pieces for generations to come.

NEW cuckoo clocks:

Rombach und Haas is proud to celebrate its "eleventy-first" (111th) anniversary this year. To mark this event the clockmakers at Romba are introducing four special clocks of which only 111 of each are made. Each clock comes with a number and certificate.
